

# Marcos Porto

Software Engineer  
Ruby on Rails | React

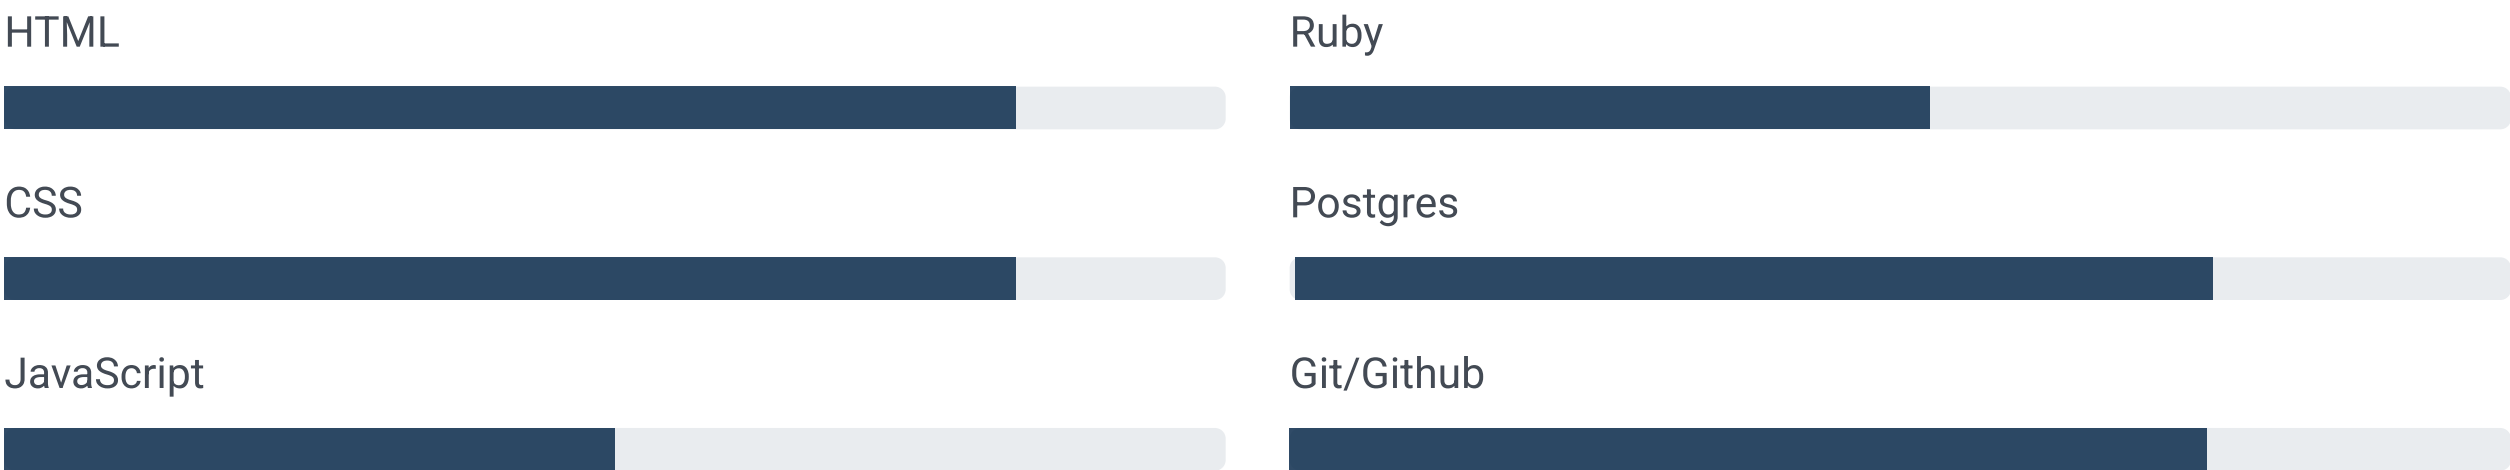

## About Me

Hello! I'm Marcos 🙋 I'm a software developer with main knowledge in JavaScript and Ruby on Rails. I worked for about 8 years as a Production Engineer in business administration, however, I've been dedicating myself to completing this career transition. As a result, I've reached excellent front-end skills and also in back-end. Finally, I'm a person motivated by new challenges and able to handle multiple daily tasks. I have a strong sense of organization and I use to have a creative approach to problem-solving being able to work autonomously, and quickly grasp new concepts.

Age	33
